**AN AUSTRALIAN OWNED COMPANY**

**Kendon Plant Care Pty Ltd, 10 Abbott St, Fairfield Vic 3078 Ph 03 9497 2822**

**STORAGE AND DISPOSAL**

Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

This container can be recycled if it is clean, dry, free of visible residues and has the drumMUSTER logo visible. Triple-rinse container for disposal. Dispose of rinsate by adding it to the spray tank. Do not dispose of undiluted chemical on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any drumMUSTER collection or similar container management program site. The cap should not be replaced, but may be taken separately.

**DISPOSAL OF POST-HARVEST DIP**

Unused or spent dips should be disposed of carefully to avoid contamination of wetlands or watercourses. Dispose of dip in an authorised dip disposal facility. If an authorised dip disposal facility is not available, the spent dip should be evenly spread over flat land not exceeding 20,000 L/ha. The disposal site must be dedicated and adequately bunded (soil at least 15cm high). DO NOT dispose unwanted spent dip in the same place repeatedly, as repeated depositions in one location may, over time, create a contaminated site.

**SAFETY DIRECTIONS**

Will irritate the eyes. May irritate the skin. Avoid contact with the eyes and skin.

When opening the container and preparing spray or dip, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length chemical resistant gloves and face shield or goggles. When using the prepared spray, wear cotton overalls buttoned to the neck and wrist and a washable hat. When applying by dip wear protective waterproof clothing, elbow-length chemical resistant gloves and impervious footwear. If product in eyes, wash it out immediately with water.

After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, face shield or goggles and contaminated clothing.

**FIRST AID**

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

**SAFETY DATA SHEET (SDS)**

Additional information is listed in the Safety Data Sheet (SDS), which is available from the supplier.

**GHS STATEMENTS**

**Causes serious eye damage. May cause an allergic skin reaction. Harmful to aquatic life with long lasting effects.**

# Kendon Commercial Citrus Stop Drop

**ACTIVE CONSTITUENT: 100g/L 2,4-D  
present as the DIMETHYL AMINE SALT**

**GROUP I HERBICIDE**

For the reduction of pre-harvest drop and  
for the control of colouring of citrus fruit  
as per Directions for Use table.

THIS IS A PHENOXY HERBICIDE THAT CAN CAUSE SEVERE DAMAGE  
TO NATIVE VEGETATION AND SUSCEPTIBLE CROPS SUCH AS  
COTTON, GRAPES, TOMATOES, OILSEED CROPS AND ORNAMENTALS.

**IMPORTANT: READ THIS LEAFLET  
BEFORE USING THIS PRODUCT**

**APVMA No: 33330 / 128737**

**KD Plant Care Pty Ltd**  
10 Abbott Street, Fairfield VIC. 3078.

**AN AUSTRALIAN OWNED COMPANY**

## DIRECTIONS FOR USE RESTRAINTS

**DO NOT** apply if heavy rains or storms are forecast within 3 days.

**DO NOT** irrigate to the point of runoff for at least 3 days after application.

**DO NOT** apply if crop is stressed due to dry or excessively moist conditions.

**IN TASMANIA, THIS PRODUCT MAY ONLY BE USED FROM 15 APRIL TO  
15 SEPTEMBER UNLESS OTHERWISE PERMITTED BY THE REGISTRAR OF  
PESTICIDES.**

SITUATION	MODE OF ACTION	RATE	CRITICAL COMMENTS
Navel Oranges & Mandarins	Reduction of pre-harvest drop.	10ml / 100L of water (10ppm ai)	Apply to trees to the point of run-off. Make sure fruit is thoroughly wetted. Apply April / May when the rind colour changes from dark to light green.
Grapefruit	Reduction of pre-harvest drop.	20ml / 100L of water (20ppm ai)	Apply to trees to the point of run-off. Make sure fruit is thoroughly wetted. Apply April / May when the rind colour changes from dark to light green.
Navel Oranges, Mandarins & Grapefruit	Retardation of colouring, delay aging to rind.	10ml / 100L of water (10ppm ai) <b>plus</b> Gibberellic Acid at label rate	Addition of Gibberellic Acid to Citrus Stop Drop spray will hold fruit in good condition after July.
All Citrus	Post-harvest dipping (Ethylene degreening).	500ml / 100L of water in bulk dipping tank (500ppm ai)	Dipping in 500ppm 2,4-D solution before gas colouring assists in retaining the green colour in the buttons. 2,4-D should be used with care on very green fruit due to potentially adverse cosmetic effects on the skin. Kendon Commercial Citrus Stop Drop can be mixed with fungicides in the bulk dipping tank.

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO  
THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

**WITHHOLDING PERIOD: NOT REQUIRED WHEN USED AS DIRECTED.**

## GENERAL INSTRUCTIONS:

This product is for professional growers only. Do not use at rates higher than recommended as damage may result. Store away from seeds, seedlings, fertilisers and other chemicals or any materials used on plants.

### Spray Drift Restraints

**DO NOT** apply by a boom sprayer.

**DO NOT** apply by aircraft.

Specific definitions for terms used in this section of the label can be found at [www.apvma.gov.au/spraydrift](http://www.apvma.gov.au/spraydrift)

**DO NOT** allow **bystanders** to come into contact with the spray cloud.

**DO NOT** apply in a manner that may cause an **unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production**, or cause contamination of plant or livestock commodities, outside the application site from **spray drift**. The **buffer zones** in the relevant buffer zone table below provide guidance but may not be sufficient in all situations. Where ever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

**DO NOT** apply unless the **wind speed** is between 3 and 20 kilometres per hour at the **application site** during the time of application.

**DO NOT** apply if there are **hazardous surface temperature inversion** conditions present at the **application site** during the time of application. **Surface temperature inversion conditions** exist most evenings one to two hours before sunset and persist until one or two hours after sunrise.

### VERTICAL SPRAYERS

**DO NOT** apply by a vertical sprayer unless the following requirements are met:

- Spray is not directed above the target canopy
- The outside of the sprayer is turned off when turning at the end of rows and when spraying the outer row on each side of the application site.
- For dilute water rates up to the maximum listed for each type of canopy specified, minimum distances between the application site and downwind sensitive areas (see 'Mandatory buffer zones' section of the following table titles 'Buffer zones for vertical sprayers') are observed.

### Buffer Zones for Vertical Sprayers

Type of target canopy and dilute water rate	Mandatory buffer zones (distances given in metres)				
	Bystander Areas	Natural Aquatic Areas	Pollinator Areas	Vegetation Areas	Livestock Areas
2 metres tall and shorter, maximum dilute water rate of 1000 L/ha	0 metres	0 metres	0 metres	0 metres	0 metres
Taller than 2 metres (not fully-foliated), maximum dilute water rate of 4000 L/ha		15 metres		15 metres	
Taller than 2 metres (fully-foliated), maximum dilute water rate of 4000 L/ha		10 metres		5 metres	

## Resistant Weeds Warning

**GROUP 1 HERBICIDE**

Kendon Commercial Citrus Stop Drop is a member of the Phenoxy group of herbicides. The product has the Disruptors of plant cell growth mode of action.

For weed resistance management Kendon Commercial Citrus Stop Drop is a Group I herbicide. Some naturally-occurring weed biotypes resistant to Kendon Commercial Citrus Stop Drop and other Group I herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Kendon Commercial Citrus Stop Drop or other Group I herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Kendon Plant Care Pty Ltd accepts no liability for any losses that may result from the failure of Kendon Commercial Citrus Stop Drop to control resistant weeds.

### PRECAUTIONS

If re-entering treated areas before the spray has dried, workers should wear overalls, elbow-length gloves and water-resistant footwear. Clothing must be laundered after each days use.

### PROTECTION OF CROPS, NATIVE AND NON-TARGET PLANTS

DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Avoid spray drift and vapour movement onto susceptible crops such as cotton, tobacco, tomatoes, vines, lupins, fruit trees and ornamentals.

### PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product or used containers.

### STORAGE AND DISPOSAL

Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations.

Do not burn empty containers or product.

This container can be recycled if it is clean, dry, free of visible residues and has the drum MUSTER logo visible. Triple-rinse container for disposal. Dispose of rinsate by adding it to the spray tank. Do not dispose of undiluted chemical on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any drumMUSTER collection or similar container management program site. The cap should not be replaced, but may be taken separately.

### Disposal of post-harvest dip

Unused or spent dips should be disposed of carefully to avoid contamination of wetlands or watercourses. Dispose of dip in an authorised dip disposal facility. If an authorised dip disposal facility is not available, the spent dip should be evenly spread over flat land not exceeding 20,000 L/ha. The disposal site must be dedicated and adequately banded (soil at least 15cm high). DO NOT dispose unwanted spent dip in the same place repeatedly, as repeated depositions in one location may, over time, create a contaminated site.

### SAFETY DIRECTIONS

Will irritate the eyes. May irritate the skin. Avoid contact with the eyes and skin. When opening the container and preparing spray or dip, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length chemical resistant gloves and face shield or goggles. When using the prepared spray, wear cotton overalls buttoned to the neck and wrist and a washable hat. When applying by dip wear protective waterproof clothing, elbow-length chemical resistant gloves and impervious footwear. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, face shield or goggles and contaminated clothing.

### FIRST AID INSTRUCTIONS

If poisoning occurs, contact a doctor or poisons information centre. Phone australia 13 11 26.

### CONDITIONS OF SALE

The product as supplied is of high grade and believed to be suitable for any purpose for which it is expressly supplied and must be used in accordance with the directions for use given on this label. No responsibility is accepted in respect of this product, save those non excludable conditions implied by the Trade Practices Act or any applicable State Legislation.

### GHS STATEMENTS

Causes serious eye damage. May cause an allergic skin reaction.
