VEGETABLES, ORNAMENTALS
AND FOR GREENING LAWNS.**

25kg

AN AUSTRALIAN OWNED COMPANY, Est. 1950

Kendon Chemical & Mfg Co Pty Ltd, 10 Abbott St, Fairfield VIC 3078 Ph 03 9497 5247

DIRECTIONS FOR USE

The recommended amount of Iron Chelate should be applied evenly over the area to be treated. Water in or cultivate after application.

FRUIT TREES

Use 30-50g / 10L of water. Water in around the tree root zone.

Larger trees may require 3 or 4 applications at weekly intervals.

Apply 3-5g / per square metre of nursery stock.

ROSES & ORNAMENTALS

Use 50g / 10L of water and apply for 10m² coverage, preferably when soil is moist.

LAWNS

Use 10g / 10L of water for 10m² coverage, where green colour needs improving, due to iron deficiency.

The required amount of lawn fertiliser may be mixed in with Iron Chelate to cover the 10m².

Symptoms of Iron Deficiency (Chlorosis)

A noticeable loss of green colour early in the season, starting with young leaves.

Fruit trees and ornamentals may suffer dieback of shoots and eventual plant death.

Grasses and cereals show yellow striping of the leaves with the veins at first remaining green.

PRECAUTIONS

Avoid contact with the skin and eyes to prevent possible irritation.

Wash skin thoroughly after use.

Close the container tightly to prevent moisture absorption.

SAFETY DATA SHEET

For further information refer to Safety Data Sheet (SDS), which is available from the supplier.
