Kanolacide Spray Adjuvant

ACTIVE CONSTITUENT: 865g/L CANOLA OIL

For use as an adjuvant to improve spray droplet deposition, wetting and spreading and reduce evaporation.

Kanolacide provides the following benefits for spray applications:

- *Reduces evaporation of spray droplets whilst in flight and from spray deposits*
- *Improves wetting, sticking and spreading of spray deposits*
- *Is biodegradable and based on natural oils*

DIRECTIONS FOR USE

SITUATION	APPLICATION RATE	CRITICAL COMMENTS
Broadacre & Boom Spray	200ml - 500ml / 100L	Use the lower rate when using low application rate products.
Hand Gun	100ml - 200ml / 100L	
CDA or ULV	1L - 2L / Ha	
Tre Crops (High Volume)	100ml - 200ml / 100L	
Vegetables	150ml - 200ml / 100L	
Knapsack	20ml - 30ml / 10L	

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

WITHHOLDING PERIOD: NOT REQUIRED WHEN USED AS DIRECTED.

GENERAL INSTRUCTIONS

Kanolacide is an emulsifiable vegetable oil product which is suitable for use with herbicides, insecticides and fungicides. It can increase pesticide activity by improving spray deposition, increased wetting and reducing evaporation of spray deposits. Kanolacide is non-phytotoxic at recommended rates.

IMPORTANT

Prior to use, read all directions on this label and on the label of the pesticide product being used. Any specific usage or restrictions on the pesticide's label have precedence over directions for use referred to on this label.

MIXING INSTRUCTIONS

Kanolacide mixes quickly and easily with water and should be added directly to the spray tank after the addition of the pesticide. It should not be pre mixed with any other product prior to adding into the spray tank. Maintain good agitation while spraying.

COMPATIBILITY

Kanolacide is compatible with most herbicides, insecticides and fungicides. Always check the label of the pesticide for any adjuvant compatibility restrictions before use.

CROP SAFETY

Refer to the directions on the pesticide product label. Caution must be exercised when applying Kanolacide with agricultural chemical products on sensitive crops during periods when plants are subject to drought stress, high temperatures or high humidity. If in doubt about the appropriateness of using Kanolacide, please test by application to a small area before using it on full scale basis.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate dams, rivers or waterways with the chemical or used container.

STORAGE AND DISPOSAL KEEP OUT OF REACH OF CHILDREN.

Store in the closed, original container, in a well-ventilated area out of direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots in compliance with the Local, State or Territory government regulations. Do not burn empty containers or product.

REFILLABLE CONTAINERS

If returning containers for refill, do not rinse, instead replace cap and return to designated collection point.

SAFETY DIRECTIONS

Avoid contact with skin and eyes. Wear overalls, rubber gloves, goggles or disposable face shield. After each day's use, wash contaminated clothing, gloves and face shield with soap and water.

WHEN USING TOGETHER WITH OTHER CHEMICALS CONSULT THEIR SAFETY DIRECTIONS.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre, Phone Australia 13 11 26.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet (SDS), which can be obtained from the supplier.
